

# How to Use Tabs in Mozilla Firefox and Moodle

## When Using the Web

While searching the web for information, HCC recommends using Mozilla Firefox as your browser. Other browsers may also be acceptable. When you click on a link you may leave a page that you need to reference. One easy way to go between pages is to open multiple tabs at one time.

Right click on a link or page and hit open in a new tab. This is also helpful in Moodle when referencing multiple pages.
